

Itmax secures RM47.2 mln variation order from DBKL

KUALA LUMPUR: Itmax System Berhad (Itmax), a company primarily involved in the business of supply, installation, and provision of public space networked systems, announced that the Group has been awarded a RM47.2 million variation order from Kuala Lumpur City Hall (DBKL).

Itmax has been involved in the supply, installation and maintenance of networked lighting systems in Kuala Lumpur for DBKL since 2016.

In addition to its responsibilities under the existing networked lighting systems contract with DBKL, Itmax, under this variation order, is required to upgrade

the light-emitting diode (LED) street lights including replacing the defective and out-of-warranty LED street lights.

Itmax System managing director/chief executive officer William Tan Wei Lun said, "We have been working closely with DBKL to enhance the safety and quality of life in Kuala Lumpur with our smart

city solutions.

"This variation order is one of DBKL's initiatives to ensure that all LED street lights are fully functional as they play a crucial role in ensuring public and traffic safety.

"We look forward to working with DBKL to deliver more smart city solutions in the future."
