

Calling all book lovers

THE National Library will be organising more than 29 'edutainment' based activities using its ICT facilities throughout the whole year in an effort to attract youth to visit the library and foster a love for reading among them.

National Library director-general Datuk Raslin Abu Bakar says the activities specifically target children and adolescents.

The library has planned 15 activities for children and another 14 activities for adolescents this year.

All the activities will be conducted in the library's Children's Hypermedia Centre and Adult's Hypermedia Centre, he said.

Among the programmes that will be carried out during the programme are an Information and Media Workshop, Information Adventure Quiz as well as the Muzium Information exploration.

All kinds of prizes and rewards await those who take part in some of the programmes, added Raslin.

Members of the public can obtain more

Raslin says the activities are specifically targetted for children and adolescents.
