

Drain collapses in Kg Kerinchi

KUALA LUMPUR: A collapsed drain has caused a large cavity to form along Jalan Pantai Permai in Kampung Kerinchi.

Kuala Lumpur City Hall (DBKL) said on its Facebook page that it was aware of the matter.

“Following the collapse, safety tape as well as water barriers and cones have been placed at the site at 10pm on Monday,” it said in a post yesterday.

The collapsed drain has resulted in part of the sidewalk collapsing as well, based on photos of the incident.
